## Professional Experience

### Epic / Implementation Project Manager - Resolute Hospital Billing

August 2014 - January 2019: Madison, WI

- Managed six long-term and large-scale software implementation projects to successful completion
- Communicated technical subjects to stakeholders in non-technical roles to design and understand workflows
- Built the customer's Epic environment, based on understanding of customer needs
- Designed testing scripts, and tested customer environments
- Reported audience specific project status regularly to IT and Operational stakeholders
- Maintained large datasets of charge code data in SQLite files, and use Python for database updates and reporting

### Epic / Internal Full Stack Developer

July 2018 - January 2019: Madison, WI

- Built and maintained an internal executive reporting portal, from database to front end (MSQL, C#ASP.NET, CSS/HTML/JS)
- Communicated project timelines and confirm priorities with executive stakeholders
- Updated the website front end and back end based on end user feedback

### Arts on the Hudson / Full Stack Developer

January 2018 - January 2019: Jersey City, NJ | Remote

- Built and maintained the Arts on the Hudson website using Django, hosted on Digitalocean
- Maintained and moderated the Arts on Hudson Slack channel
- Developed slackbots using Slack web API and Django, to assist in time logging

## Education

### Penn State University / B.S in Finance & B.S in Spanish

August 2010 - May 2014

### Udemy.com / Courses in:

Python, Javascript, Django, VueJS, Git, REST Framework, UX and UI

## Hobbies

### Music

- I play guitar, sing and enjoy performing at local open mics
- I enjoy discovering and sharing new music
