Professional Experience

Epic Systems

August 2014 - January 2019

Internal Full Stack Developer

July 2018 - January 2019: Madison, Wi

- Took on additional responsibility to build and maintain an internal executive reporting portal, from database to front end (MSQL, C#ASP.NET, CSS/HTML/JS)
- Communicated project timelines and confirm priorities with executive stakeholders
- Updated the website front end and back end based on end user feedback

Implementation Project Manager - Resolute Hospital Billing

August 2014 - January 2019: Madison, Wi

- Managed six long-term and large-scale software implementation projects to successful completion
- Maintained large datasets of charge code data in SQLite files, and use Python for database updates and reporting
- Communicated technical subjects to stakeholders in non-technical roles to design and understand workflows
- Built the customer’s Epic environment, based on understanding of customer needs
- Designed testing scripts, and tested customer environments
- Reported audience specific project status regularly to IT and Operational stakeholders

Arts on the Hudson

Full Stack Developer

January 2018 - January 2019: Jersey City, NJ | Remote

- Built and maintained the Arts on the Hudson website using Django, hosted on Digitalocean
- Maintained and moderated the Arts on Hudson Slack channel
- Developed slackbots using Slack web API and Django, to assist in time logging
